MECHANICAL ENGINEERING / NUCLEAR ENERGY SPECIALISATION - DAMASCUS UNIVERSITY

National classification: 72%

LANGUAGE SKILLS

Mother tongue(s): **ARABIC**

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C2	C2	C2	C2	C2
FRENCH	A2	A2	A2	A2	A2

COMMUNICATION AND INTERPERSONAL SKILLS

Communication and interpersonal skills

- Good communication skills from my experience as a Service Desk Coordinator and later Engineer, where the most of communications were by phone where a combination of poor voice quality, the need for a quick and precise conveying of information, and technical terms provided the perfect proving grounds to communicate in concise and effective manner.
- Additionally, my experience as a Trainer on Monitoring and Alarms Systems honed my ability to pick up non-verbal cues from my students where I was able to tell if someone was not comprehending the point being discussed and is being embarrassed to ask.
- Further more, my experience as a Translator and Editor for ICDL v4 curriculum helped me later in my subsequent position as a Service Desk Coordinator & Engineer and while writing the curriculum of the "Monitoring and Alarm Systems" course. The written communication style differ between textbooks and email but they share a core of providing detailed and brief description of points being made while leaving room for more elaboration.
